2607316877538	2026-07-31 20:07:56	paid	online_organik	358537655287808	553,000
2607316877538	2026-07-31 20:12:00	paid	online_organik	358537655287808	552,000

Temuan utama

- 1. Basis tanggal beda: NocoBase pakai tanggal transaksi masuk (created, WIB), Scalev pakai paid_time (UTC). Angka 1,277 vs 863 tidak bisa dibandingkan 1:1.
- 2. 424 order paid ber-ID numerik tidak ada di tabel orders Scalev (0 dari 425 ketemu) — bukan format ID Scalev.
- 3. Duplikat ID: 4 id muncul berulang (11 baris), contoh 260726PODLINZ muncul 5x dengan cabang & nominal berbeda.
- 4. Revenue beda definisi: di 759 order overlap, NocoBase Rp 435,079,761 vs Scalev Rp 421,450,000 (selisih Rp 13,629,761).
- 5. NocoBase menandai paid lebih awal: 87 order scalev-format 'hanya di NocoBase' → 69 masih unpaid & 65 paid_time NULL di Scalev.
- 6. 188 offline_store ikut terhitung; setelah dikeluarkan tetap 1,089 ≠ rekap manager 1,074.
- 7. Kualitas data: 45 baris checkout=0, 3 kosong, 1 payment_status kosong.

Rekomendasi

Scalev tetap sumber kebenaran closing/revenue (keputusan AGENTS.md). Angka NocoBase tidak dipakai untuk metrik.

NocoBase hanya untuk lapisan follow-up/lead manual.

Jika NocoBase tetap dipakai: dedup id_order, pisahkan offline_store, samakan basis tanggal (paid vs created), perbaiki checkout=0/kosong.
